IS IT PREDATORY?
CHECKLIST FOR EVALUATING JOURNALS

Publishing your work is central to your career and the advancement of knowledge in your field, so it's important to choose a journal and a publisher that you can trust. While there is no definitive indicator of a "predatory publisher," this checklist is developed as a tool to assist you in deciding if the journal adheres to ethical publication practices.

ADDITIONAL CONSIDERATIONS

Once you’ve determined if the journal adheres to ethical publication practices, you may wish to evaluate it by additional criteria. For instance – Who is the audience of this journal? What is its distribution or impact factor? Will it allow you to retain copyright and control of your work? Librarians are available to provide tools and guidance as you address each of these questions.
