

## Finding Books in CUNY+

**CUNY+** is the online catalog of the entire CUNY library system. It can tell you what books (as well as eBooks, journals, videos and many other items) each library owns. You can search the entire CUNY system or limit to Lehman College Library holdings. Here's how to begin:

1. Go to the Lehman College Library website at [www.lehman.edu/library](http://www.lehman.edu/library)
2. Use the **Search Our Resources** "Find Books" box to search the CUNY+ Online Catalog
3. Click on the pull-down menus to **Select search type** and **Select Library** (the default is Lehman)
4. Use a **Keyword** search when exact title, author or subject is unknown; for example "fashion" or "fashion history".
5. Use **Begins with** (title, author, subject begins with) search when you know the exact information; for example **Title begins with** *culture of fashion*.  
(You must leave out the initial word **The**) See image below.

The screenshot shows the "Search Our Resources" page. A red dashed oval highlights the "Search Our Resources" title. A green box contains a tip: "Tip: Leave out initial articles (a, an, the) from your title browse searches." Below the title are tabs for "Find Books", "Find Articles", "E-Journals", "eBooks", and "Digital Collections". The "Find Books" tab is selected. Below the tabs is a search area with the text "Search the CUNY+ Online Catalog to find books, multimedia materials, and other resources." There are two pull-down menus: "Lehman College" and "Keyword anywhere". A blue callout box points to the "Lehman College" menu with the text "Search one or All CUNY Libraries". A blue callout box points to the "Keyword anywhere" menu with the text "Pull Down Menu". Below the search area are links for "Search", "Guided Search", and "My Account". At the bottom, there are two sections: "Find Resources" with links for "Books" and "Databases", and "Our Services" with links for "Ask-A-Librarian" and "Interlibrary Loan".

You can use **Guided Search** for advanced searches, such as those limited to **Record Type** (book, electronic, etc.) or combination searches: **ex. Author:** Smith and **Title:** Chemistry.
